

Brooke Dobson

Recovery Partners

Brooke started working at Recovery Partners in June 2011 after working for seven years in the hairdressing industry. Throughout her career she has developed professional skills that have enabled her to succeed in an environment where the staff work together to provide their valued customers with the best care they can.

Within her previous profession, Brooke supervised a range of junior staff and assisted with the managerial and administration role of the business. She demonstrated a great work ethic in this industry and maintained a great professional relationship with regular clients. Brooke has gained valuable experience in this industry and has recently decided that it was time to apply her interpersonal skills to a new context.

Brooke is hoping to utilise her well developed communication skills within her role at Recovery Partners to show that she can be a flexible, positive and motivated team player. Brooke will strive to work to the best of her ability and will put in 100% effort so that she can be seen as an asset to the company. Outside Recovery Partners, Brooke enjoys shopping, travelling and socialising with friends and family.
